

TECHNICAL PROJECT

SIMPLE PROJECT AND MANUFACTURING DRAWINGS

Based on your client's visualization we can produce technical projects with different levels of detail or manufacturing documentation for your production.

WHAT DO WE OFFER?

- > Processing of technical documentation based on a 3D model or visualization.
- > Types of documentation ranging from simple to manufacturing including assembly documentation.
- > Evaluation of the most suitable construction solutions is an integral part of our service.
- > Consultations of a selected technical solution.
- > In case of more complex projects we can arrange for a project engineer to be present during exposition construction.

SOFTWARE

Constructors produce all documentation in BIM software ArchiCAD. The modern way of designing simplifies process of coordination of all components in complex projects, minimizes risk of errors and improves visualization of the design not only for a manufacturer but also for assembly team.
